

<b>Activity</b>	<b>Aspect</b>	<b>Environmental Impact</b>	<b>Objective</b>	<b>Target</b>	<b>Person Responsible</b>	<b>Key Performance</b>	
						<b>Indicator</b>	<b>Operational Control</b>
Kayaking	Materials	Boats and paddles made of plastic, takes CO <sub>2</sub> to produce	Avoid buying new boats in favour of recycling used boats	Reduce new boat purchases to zero effective September 2013	Gear Officers	Annual Inventory, Account records	Committee meetings to enforce policy, check up on all purchases made
		Transport of boats from factory to St Andrews, some models American	Buy British brands, e.g. Pyranha, buy from local shops	Acquire all boats from Scotland effective September 2013		Gear Officers	Annual Inventory, Transport claim records
Transport	Competitions in England increase our CO <sub>2</sub> emissions. Many large cars and vans used, weighed down with gear. Typical Ford Transit efficiency 21-27 mpg	Travel to rivers is extensive, occurs every weekend.	Reduce distance travelled	Choose local rivers where possible effective September 2013	Trip organiser	Record all rivers visited on the blog, and distance travelled	Committee to read blogposts to verify which rivers are chosen and what their distance is. Compare from year to year.
		Increase driving efficiency to reduce emissions.	Increase driving efficiency by 5mpg e.g. keeping to speed limits, minimal rapid ac/deceleration effective September 2013	Driver		Record mpg, give a prize to the most efficient driver.	Make mpg records public on our Google drive so that the committee can check that they're being taken and uploaded
		Maintain vehicles in good condition effective September 2013		Driver	Check tyre pressure, oil and water. Report faults to the AU	Liaise with AU once a month to make sure that these checks are being made.
